FOUNDED

Eschborn

HEADQUARTERS

With a project-based consulting approach, we support our clients from the very first project idea to the successful completion of every milestone.

WHAT WE DO FOR YOU

Strategy & Processes

Setting the strategic direction for tomorrow's IT, analyzing and optimizing business processes, and preparing requirements so that your organization and IT can respond to them in a targeted way.

Cloud, AI & Agentic Delivery

Unlocking the potential of the cloud and using generative AI and agentic workflows with purpose: from platform and architecture to verifiable specifications and an accompanied pilot, with clear human accountability.

HOW WE WORK

We support projects from the first idea to the last milestone – mainly in financial services, insurance, pharmaceuticals and chemicals, but in many other industries as well. Our focus areas: transformation, migration, cloud, IT service management, process consulting, compliance, security and business analysis. On request, we take on project management as well – traditional or agile.

Transformation & Project Management

Supporting technological change and migrations end to end, and steering projects and programs with agile and traditional methods – from the initial analysis to the handover into operations.

IT Service Management, Security & Compliance

Organizing IT services in a standardized and efficient way, and strengthening the security and reliability of your IT systems with suitable security, compliance and governance concepts.

INDUSTRIES WE WORK IN

Banking

Financial services (e.g. stock exchange)

Insurance
